EXPERIENCE

Gridizen, Karachi - *Software Engineer*

MARCH 2024 - PRESENT

- Designed and developed cross-platform mobile applications using React Native.
- Worked closely with backend developers to integrate RESTful APIs and improve app performance.
- Managed the app submission process, including app store guidelines compliance, signing, and versioning, and successfully published apps to Google Play and the App Store.

Fugen Services, Karachi - *Software Engineer*

APRIL 2022 - MARCH 2024

- Developed and maintained mobile applications using React Native, TypeScript, and Redux.
- Optimized app performance, reducing load time through efficient state management.
- Integrated third-party services such as Firebase for real-time database, authentication, and notifications.
- Created custom REST APIs using Express.js for data handling and socket.io for real time communication.

EDUCATION

Karachi Institute of Economics & Technology, Karachi - *BSCS*

AUGUST 2017 - MAY 2021
